Algebraic and Enumerative Combinatorics in Okayama

Date: February 19 (Mon) – 23 (Fri), 2018
Place: Graduate School of Natural Science and Technology Building No.1, Okayama University

Theme of Conference
The aim of this conference is to allow participants an opportunity to discuss recent developments and new ideas in algebraic and enumerative combinatorics and related areas such as representation theory, algebraic geometry and statistical physics. Topics will include (but are not limited to): plane partitions, P-partitions, alternating sign matrices, perfect matchings, and symmetric functions.

Invited Speakers
Roger Behrend, Mihai Ciucu, Shuhei Kamioka, Jang Soo Kim, Hiroshi Naruse, Greta Panova, Tom Roby

Sponsored by Research Institute for Interdisciplinary Science, Okayama University.
